AIRPORT TECHNOLOGY

Statement of Qualifications

Hurst Technologies: The customized *engineering* approach to airport technology.

While airport regulations and technologies continue to evolve, one thing remains constant—Hurst Technologies. For twenty years, Hurst has played a pioneering role in integrating airport communications infrastructure, security and computer systems. Airport professionals turn to Hurst for our customized engineering approach to balancing technology and regulatory demands with shrinking budgets, all while ensuring the safe, smooth flow of both equipment and people.

Hurst’s team has planned, developed, and managed the deployment of advanced technologies in more than 50 projects at many of the major airports across North America. In fact, our professionals have performed multiple technology projects at 19 of the top 50 busiest airports in the United States.

Hurst doesn’t sell packages or represent vendors. We always bring an independent, objective point of

view to each project and support it with our hands-on evaluations of current and next-generation systems, regulatory requirements, and, above all, the expertise and experience of our analytical staff. Large and experienced enough to handle complex airport communications technology projects, but small enough to offer affordable pricing and terms, Hurst is an airport operator’s engineer—not a vendor disguised as a consultant or services firm.

Our engineers have an average of 25 years experience and Hurst is an active member of the Airport Council International (ACI) and is a member of the American Association of Airports Executives (AAAE). Among the areas Hurst Technologies has depth and breadth of expertise:

<p>Technology & Communications Comms / Ops Center Design LAN / WANS VPNs Internet / Intranet Radio Communications Wireless Access Points Copper & Fiber Backbone Phones / PDAs WiFi</p>	<p>Safety & Security Video Surveillance Perimeter Security Access Control Computer Aided Dispatch 911 & Emergency Dispatch CCTV Mobile CMD Post Biometric ID Security Checkpoints</p>	<p>Development & Maintenance Document Management Bldg Management & Controls GIS Work Orders Parts Inventory Resource Scheduling Vehicle Fuel Management</p>
<p>Airline / Airside Operations CUTE MUFIDS Public Address (audio & visual) Master Clock Airfield Lighting Control Dynamic Signage Gate Management Baggage Matching</p>	<p>Landside Operations AVI Taxi Dispatch Shared Tenant Services</p>	<p>Administration Financial Management Property & Space Lease Mgt. Information Kiosks</p>
